

**International Symposium  
„Human induced pluripotent stem cells“ (ForIPS)**

**December 6, 2017**

**Carl Friedrich von Siemens Stiftung**

(Südliches Schlossrondell 23, 80638 München)

- 08.55 – 09.00 **Welcome**
- 09.00 – 09.45 **“Genes and Parkinson’s disease: architecture of a complex disorder”**  
**Thomas Gasser**, German Center for Neurodegenerative Diseases (DZNE),  
Tübingen, Germany
- 09.45 – 10.30 **“New Insights and Controversies About  $\alpha$ -Synuclein in Parkinson’s disease”**  
**Dennis Selkoe**, Harvard Medical School, Center for Neurologic Diseases,  
Boston, USA
- 10.30 – 11.00 **Coffee break**
- 11.00 – 11.30 **“Autophago-exosomes: linking lysosomal inhibition to disease progression in synucleinopathies”**  
**Georgia Minakaki**, Department of Molecular Neurology, University Hospital  
Erlangen, Germany
- 11.30 – 12.00 **“Mitochondrial function in iPS cells and thereof derived dopaminergic neurons of patients with Parkinson’s Disease”**  
**Constantin Stautner**, Institute of Developmental Genetics, Technical  
University Munich, Germany
- 12.00 – 12.45 **Lunch**
- 12.45 – 13.30 **“Taking advantage of iPSCs technology to understand neurodegenerative diseases and devise therapeutic solutions”**  
**L. Roybon**, Stem Cell Laboratory for CNS Disease Modeling, Lund  
University, Sweden
- 13.30 -14.00 **“The Trojan horse: adaptive immunity in sporadic Parkinson’s disease”**  
**Beate Winner**, Department of Stem Cell Biology, University Hospital  
Erlangen, Germany
- 14.00 -14.30 **“Human induced pluripotent stem cells in sporadic Parkinson’s disease: status and perspective”**  
**J Winkler**, Department of Molecular Neurology, University Hospital  
Erlangen, Germany
- 14.30 **Farewell**
